Aptean OEE Cloud

Modernize your business with comprehensive cloud-enabled OEE for process and discrete manufacturers

The Aptean OEE Cloud provides manufacturers in industries such as machinery manufacturing, automotive, wood, food and beverage, plastic and rubber and chemical with a complete and compelling OEE solution backed by the security, flexibility, and scalability of a SaaS model. We deliver all of the industry-leading capabilities found in Aptean OEE without the challenges of a traditional on-premise deployment.

Reduced Costs

Remove the high cost of hardware and labor that come from running your own data center, and avoid unplanned expenses with defined, predictable costs

Access Anywhere

Provide your users with greater flexibility by enabling them to access Aptean OEE data, wherever they have an internet connection

High Availability

Always on, always available – Aptean's SLA guarantees 99.9% uptime via the Microsoft Azure™ platform

Increased Security

Aptean OEE is accessible through our secure and monitored online environment for maximum protection against a breach of your data

Disaster Protection

Your data is backed up, and always available even if your facilities suffer from a natural disaster, hardware failure, or other unfortunate event

Support Growth

Our scalable model allows you to dynamically add computing power and capacity as you grow, instead of paying now for your future needs

Robust, Secure Hosting for your Aptean OEE Infrastructure

Powered by Microsoft Azure, Aptean OEE Cloud delivers the rich features you need in a secure environment that is trusted by 95% of the Fortune 500. All of the information and insights you require are delivered through a complete and compelling user experience allowing you to focus on managing and growing your business.

Key Features & Benefits

- **A Trusted Platform** – Microsoft Azure features embedded security across the broadest global footprint and the largest compliance portfolio, with enterprise-grade SLAs, and industry-leading support. Aptean leverages segmentation and volume encryption to provide you with the highest degree of data security, as well as reliability and flexibility.

- **Minimize On-Premise Hardware** – A move to the Cloud means fewer costly hardware purchases and upgrades.

- **Downtime Loss Avoidance** – When on-premise systems are down it's not just hardware that's not running, it's the whole company. A 99.9% uptime guarantee insures against potentially huge losses including wages and salaries, production downtime, reduced customer service levels, and more.

- **Managed Tech Services** – Experienced Microsoft and Aptean experts handle upgrades, health checks, and code deployments to take the burden off your internal IT infrastructure, saving you time, money, and resources while reducing risks.

- **Managed Upgrades** – Unlike a typical subscription model, you can stay current on your own schedule to manage changes and mitigate the disruptions that come with a new release upgrade.

- **Performance Optimization** – Your system is kept finely tuned for speed and performance so that it can scale without interruption. Benefit from maximized productivity, even as your database and usage grow.

Aptean OEE is the solution for manufacturing companies that help them improve their production efficiency, by collecting and combining data from machines and operators, visualizing and helping them analyze the production and the losses in an efficient platform with a user-friendly UI.

Make your move to the Cloud today and step up to the most secure and profitable way to run your business. For more information on the Aptean OEE Cloud, contact your account manager or email us at **info@aptean.com**.

Aptean is a global provider of mission-critical, industry-specific software solutions.
