

# Aptean eCommerce for Apprise ERP

## A scalable online storefront that works with Apprise

To grow and scale your business, you need an efficient way to get your products in front of your customers and capture orders. But traditional catalogs and ecommerce platforms are disconnected from your ERP, creating layers of inefficiency – from time-consuming product catalog updates to the re-keying of orders. Aptean eCommerce bridges this gap, allowing you to quickly and easily launch an online B2B or B2C storefront that features two-way integration with Apprise ERP.\* This solution eliminates the errors and inefficiencies of maintaining two separate platforms while delivering a user-friendly shopping experience to your customers.

- Ensure up-to-date product information –**  
 Automatically import and sync your product catalog, pricing, and product availability from Apprise, keeping your storefront offerings up-to-date without time-consuming maintenance.
- Capture orders automatically –** Purchases made in eCommerce are automatically captured as orders in Apprise, eliminating error-prone re-keying.
- Automate and streamline accounting –**  
 eCommerce leverages Aptean Pay, Aptean’s ERP-integrated payment platform, during checkout, so payment transactions are captured in Apprise nearly instantly, automating Accounts Receivable reconciliation and other accounting processes.
- Provide an engaging shopping experience –**  
 Give customers a pleasant and intuitive shopping experience with a clean, modern interface and helpful features like side-by-side product comparisons.
- Expedite order fulfillment –** By automating order creation and payment capture, eCommerce streamlines the order fulfillment process so you can deliver faster to your customers.

## Key Features

- **Product data from Apprise** – Automatically import your product catalog and pricing straight from Apprise ERP, including SKU, price, weight, image, stock level, and other product details.
- **Product availability** – Inventory management data in Apprise – like physical stock, available quantities, and backorder and pre-order status – flows into eCommerce, so shoppers can see if a product is out of stock or backordered, and when it will be available again.
- **Promotions and discounts** – eCommerce continually syncs with Apprise, so promotions or discounts you set for your products in the ERP will be reflected in your eCommerce product catalog right away.
- **Checkout options** – Shoppers can select Guest Checkout for one-time checkout, or can create an account in eCommerce to streamline the process for future purchases.
- **Integration with Apteon Pay** – eCommerce leverages Apteon Pay to accept digital payments for online purchases, enabling near-real-time payment capture, automated Accounts Receivable reconciliation, and other accounting efficiencies.
- **Shipping methods** – eCommerce is integrated with major shipping carriers like UPS and FedEx, so you can connect your carrier accounts and allow customers to select their preferred option.
- **Tax features** – Avalara tax functionality is available in eCommerce for streamlined sales tax calculations. Easily connect your existing Avalara account if you have one, or create a new account.
- **SEO management** – eCommerce features built-in tools to support search engine optimization (SEO), helping improve your search rankings and increase traffic to your store.
- **Engagement content** – Easily add polls, news articles, blogs, and other content to your storefront to boost customer engagement.
- **Security and compliance** – eCommerce meets all GDPR and PCI requirements, with regular updates made in response to legislative changes. The platform also provides SSL support, honeypot support to catch spam, and a strong and flexible customer password policy.
- **Mobile-friendly** – eCommerce is mobile-responsive, so your customers can shop from the convenience of their smartphones or tablets.
- **Fully SaaS-enabled** – Apteon eCommerce is a fully SaaS-enabled platform, but can be used with both SaaS and on-premise versions of Apprise ERP.

For more information about Apteon eCommerce, contact your account manager or email us at [info@aptean.com](mailto:info@aptean.com).

*\*Integration with Apprise ERP, and functionality associated with this integration, will be available in the Apprise Winter 2020/2021 release.*

Apteon provides very specific industries with very specific ERP, supply chain management, and customer experience solutions. In today's fast-paced, highly competitive economy, organizations don't have time to waste forcing homegrown software, spreadsheets, and one-size-fits-all solutions to do things they were never designed to do. Apteon is on a mission to end those workarounds – with industry-specific solutions instead of generic software, expert support instead of making you go it alone, and a steady influx of new ideas instead of the status quo.
