

Shop Floor Data Collection for Discrete Manufacturing Solutions

Streamlined Data Entry for a Paperless Shop Floor

From, receiving, issuing, and material and physical inventory to labor reporting, label generation, and RFID, large amounts of data continuously circulate through your shop floor. To stay ahead of the competition, you need to capture and act on it quickly. With Shop Floor Data Collection (SFDC), you can finally collect, arrange, and analyze all your critical shop floor data in a highly efficient manner.

Paperless Data Collection

SFDC eliminates the stacks of barcoded documents cluttering your shop floor. By simply scanning a Purchase Order, Shipper, or Job Order Number, you can electronically select the items to be received, shipped, or issued. And with SFDC, you can say goodbye to the days of carrying around a warehouse location list and running from terminal to terminal to look up inventory locations. With prominently displayed inventory locations, you can now easily store, transfer, or issue material.

Complete Hardware Flexibility

Because of its thin-client architecture, SFDC supports a wide range of data collection devices, including simple hardwired units and powerful mobile RF handheld devices from leading vendors like Intermec, Symbol, and Computerwise. As a result, your existing hardware can be easily integrated with other dissimilar hardware devices on the same network.

Customizable to Fit Your Needs

SFDC has been designed to flexibly conform to your needs. We can easily tailor the solution with labels for your receiving process, automated quantity-to-weight conversions, and other customizations.

LEARN MORE

Aptean provides very specific industries with very specific ERP, supply chain management, and customer experience solutions. In today's fast-paced, highly competitive economy, organizations don't have time to waste forcing homegrown software, spreadsheets, and one-size-fits-all solutions to do things they were never designed to do. Aptean is on a mission to end those workarounds – with industry-specific solutions instead of generic software, expert support instead of making you go it alone, and a steady influx of new ideas instead of the status quo.
