

Aptean Event Management Framework for Encompix ERP

An informational backbone for Encompix ERP

Your organization needs relevant information to quickly intervene and resolve situations before they escalate. Aptean Event Management Framework (EMF) for Encompix ERP allows your company to build proactive early warning systems, empowering users to respond to events on the fly. EMF is easily integrated into your existing business system infrastructure and can be configured to deliver alert notifications over a variety of communication channels.

Escalate Notifications

– Automated logic and workflows send notifications to designated users/business systems and track their responses.

Faster, Smarter Decisions –

Role-based messaging and dashboards deliver relevant information so you can make faster, more informed decisions.

Increase Collaboration

– On the road or in the office, EMF's mobile communications help users collaborate with their customers and suppliers.

Manage Risk/Compliance

– Monitor authorizations and controls to stay in compliance with regulations, manage risk, avoid fines, and expose potential fraud.

Eliminate Constant Monitoring –

With time-sensitive event monitoring, you'll receive information at the right time to respond and make corrections.

Connectivity without Coding –

EMF delivers benefits quickly by providing a solution that sits across your existing systems without a deep integration.

Workflow Categories

EMF for Encompix supports up to 50 custom, automated workflows that you can easily build yourself. Below are just a few examples of the types of workflows you can build with EMF.

- **Exception notifications** – Receive alerts when an operation is late, when an item balance goes negative, and more.
- **Routine activity automation** – Automatically send customers notice that invoices are due, send vendors notice for late materials, and send acknowledgments across the organization for repetitive operational activities.
- **Ask Encompix** – Email Encompix a question from your mobile device to get real-time status for a job, customer, or vendor.
- **Integration** – Build and manage data imports and exports via flat file triggers into other systems within your organization.

EMF also provides five out-of-the-box workflows, including automated notifications for late jobs, exceeded credit limits, changes made to job statuses, and more.

The EMF solution is affordable, easy to use, and configurable to meet the needs of your organization. With built-in alert service objects, templates, and dashboards, the solution requires minimum implementation, configuration, and training services from Aptean or your IT department. Let EMF for Encompix help keep your business in synch with your business partners, and minimize the inefficiencies and risks within your business processes.

For more information about EMF for Encompix ERP, contact your Aptean account manager or email us at info@aptean.com.

Aptean provides very specific industries with very specific ERP, supply chain management, and compliance solutions. In today's fast-paced, highly competitive economy, organizations don't have time to waste forcing homegrown software, spreadsheets, and one-size-fits-all solutions to do things they were never designed to do. Aptean is on a mission to end those workarounds – with industry-specific solutions instead of generic software, expert support instead of making you go it alone, and a steady influx of new ideas instead of the status quo.
