

# EquipSoft ERP Cloud

Modernize your business with enhanced security, integrated data, and mobility

The EquipSoft ERP Cloud provides equipment rental, sales, and service companies with a complete and compelling ERP solution backed by the security, flexibility, and scalability of a SaaS model. We deliver all of the industry-leading capabilities you need without the challenges of a traditional on-premise deployment.

## Reduced Costs

Remove the high cost of hardware and labor that come from running your own data center, and avoid unplanned expenses with defined, predictable costs

## Access Anywhere

Provide your users with greater flexibility by enabling them to access EquipSoft securely, wherever they have an internet connection

## High Availability

Always on, always available - EquipSoft's SLA guarantees 99.9% uptime via the Microsoft Azure platform

## Increased Security

EquipSoft is accessible through our secure and monitored online environment for maximum protection against a breach of your data

## Disaster Protection

Your data is backed up, and always available even if your facilities suffer from a natural disaster, hardware failure, or other unfortunate event

## Support Growth

Our scalable model allows you to dynamically add computing power and capacity as you grow, instead of paying now for your future needs

# Robust, Secure Hosting for your EquipSoft Infrastructure

Powered by Microsoft Azure, EquipSoft Cloud delivers the rich features you need in a secure environment that is trusted by 95% of the Fortune 500. All of the information and insights you require are delivered through a complete and compelling user experience allowing you to focus on managing and growing your business.

## Key Features & Benefits

- **A Trusted Platform** - Microsoft Azure features embedded security across the broadest global footprint and the largest compliance portfolio, with enterprise-grade SLAs, and industry-leading support. Aptean leverages segmentation and volume encryption to provide you with the highest degree of data security, as well as reliability and flexibility.
- **No On-Premise Servers** - A move to the Cloud means that you can eliminate costly hardware purchases and hardware upgrades, along with the license costs for database and operating systems. You'll also avoid the high cost of in-house technical expertise to maintain that hardware.
- **Downtime Loss Avoidance** - When on-premise systems are down it's not just hardware that's not running, it's the whole company. A 99.9% uptime guarantee insures against potentially huge losses including wages and salaries, production downtime, reduced customer service levels, and more.
- **Managed Tech Services** - Experienced Microsoft and EquipSoft experts handle upgrades, health checks, and code deployments to take the burden off your internal IT infrastructure, saving you time, money, and resources while reducing risks.
- **Managed Upgrades** - Unlike a typical subscription model, you can stay current on your own schedule to manage changes and mitigate the disruptions that come with a new release upgrade.
- **Performance Optimization** - Your system is kept finely tuned for speed and performance so that it can scale without interruption. You benefit from maximized productivity, even as your database and usage grow.

EquipSoft ERP is designed to elevate operations in the equipment sales, rental, and service industry. Beyond its transformative tools and capabilities, the integrated design connects departments, data, and processes. Altogether, EquipSoft ERP will deliver the precise control, clear visibility, and fluid workflow needed to take your equipment business to the next level.

Make your move to the Cloud today and step up to the most secure and profitable way to run your business. For more information, contact your account manager or email [info@equipsoft.com](mailto:info@equipsoft.com).
