

Aptean IMI Supply Chain

For High-Volume Distribution Operations

Aptean IMI Supply Chain brings together two powerful solutions – IMI Advanced Order Management (AOM) and IMI Warehouse Management (WMS) – to control all aspects of orders, inventory, and warehouse management for companies that handle high-volume distribution and fast-moving goods. IMI AOM and WMS solutions can be used independently or combined as an integrated solution.

Accelerate Your Operations

IMI AOM and WMS solutions accelerate operations across your enterprise, automating manual processes to drive down costs and give you a leg up on the competition. Designed to scale with your evolving business requirements, IMI solutions support high transaction volumes while delivering precise control and visibility across various channels, geographies, and sites.

- **Advanced Order Management (AOM)** - IMI AOM is a flexible, multi-channel order and inventory management system that provides full visibility and control of sales, purchases, returns, and inventory control processes across your global supply chain.
- **Warehouse Management System (WMS)** - IMI WMS drives efficiency and profitability across your warehouse operations, enhancing receiving, putaway, order processing, picking, packing, and shipping processes to improve space utilization, reduce labor costs, and boost delivery reliability.

Benefits

- Streamline and automate work processes
- Improve resource utilization across your warehouse
- Flexibly respond to changing market requirements
- Support multi-site and multi-client operations
- Manage individual customer requirements

Aptean provides very specific industries with very specific ERP, supply chain management, and customer experience solutions. In today's fast-paced, highly competitive economy, organizations don't have time to waste forcing homegrown software, spreadsheets, and one-size-fits-all solutions to do things they were never designed to do. Aptean is on a mission to end those workarounds – with industry-specific solutions instead of generic software, expert support instead of making you go it alone, and a steady influx of new ideas instead of the status quo.
