

# Aptean Event Management Framework for Intuitive ERP

## A new level of automation and notifications

In today's competitive market, efficiency is key. Your organization must move quickly to respond to customer questions, deliver documents and notifications, and intervene to resolve situations before they escalate. Aptean Event Management Framework (EMF) for Intuitive ERP enables you to accomplish all of these critical requirements. EMF is easily integrated into your existing business system infrastructure, putting all of its power at your fingertips.

### **Automate Notifications** –

Automated logic and workflows send notifications to designated users/business systems and track their responses.

### **Improve Decision Making** –

Role-based messaging delivers relevant information so you can make faster, more informed decisions.

### **Increase Collaboration** –

On the road or in the office, EMF's mobile communications help users collaborate with their customers and suppliers.

### **Reduce Repetitive Tasks** –

Automate routine activities by triggering customer, vendor and employee communications in real time or on a predetermined schedule.

### **Eliminate Constant Monitoring** –

With time-sensitive event monitoring, you'll receive information at the right time to respond and make corrections.

### **Connectivity without Coding** –

EMF sits across your existing systems without a need for deep integration, so you can start leveraging its capabilities right away.

## Workflow Categories

EMF for Intuitive supports automated workflows that you can easily build yourself. Below are just a few examples of the types of workflows you can build with EMF.

- **Exception notifications** – Receive alerts when an operation is late, when an item balance goes negative, and more.
- **Routine activity automation** – Automatically send customers notice that invoices are due, send vendors notice for late materials, send acknowledgments across the organization for repetitive operational activities, and more.
- **Ask Intuitive** – Email Intuitive a question from your mobile device to get a real-time status update for a job, customer, or vendor.
- **Integration** – Build and manage integrations and data imports / exports with other systems, both within and outside of your organization.

The image shows two overlapping windows. The left window is an email titled "SO Acknowledgment 000427 for your recent order from Aptean is attached - Message (HTML)". The email content includes a "SALES ORDER ACKNOWLEDGMENT" from Aptean, detailing order information and a table of items. The right window is an email titled "Please confirm delivery for the following Purchase Orders - Message (HTML)". It contains a table of due items and a workflow diagram. The workflow diagram starts with a "Schedule" trigger, followed by a "Start" node, then "SQL\_NewOpenPOs", "Data Filter", "SQL - Unique Vendors With New Open POs", "Datasection Toolbox", "Loop", "Log Message", "Dynamic Recipients", and "Email body".

Aptean provides very specific industries with very specific ERP, supply chain management, and compliance solutions. In today's fast-paced, highly competitive economy, organizations don't have time to waste forcing homegrown software, spreadsheets, and one-size-fits-all solutions to do things they were never designed to do. Aptean is on a mission to end those workarounds – with industry-specific solutions instead of generic software, expert support instead of making you go it alone, and a steady influx of new ideas instead of the status quo.
