

Aptean Made2Manage ERP Cloud

Modernize your business with comprehensive cloud-enabled ERP for made-to-order and mixed-mode manufacturing.

The Aptean Made2Manage ERP Cloud offers discrete manufacturers a complete ERP solution backed by the security, flexibility, and scalability of a SaaS model. All of the industry-leading capabilities found in Made2Manage ERP are provided without the challenges that may come with a traditional on-premise deployment.

Increased Security

Made2Manage is accessible through our secure and monitored online environment for maximum privacy and protection against a breach of your data

Reduced Costs

Remove high costs of equipment and maintenance that come from running your own data center, and avoid unplanned expenses with defined, predictable costs

Disaster Protection

Your data is backed up, and always available even if your facilities suffer from a natural disaster, hardware failure, or other unforeseen event

Scheduled Updates

Software updates and bug fixes are pushed through the cloud, guaranteeing you have the latest and greatest version

Bundled Modules

Made2Manage ERP Cloud comes already equipped with some of our most popular add-on modules—at no extra charge

Scalable Growth

Our scalable model allows you to dynamically add computing power and capacity as you grow, instead of paying now for your future needs

Robust, Secure Hosting for your Made2Manage Infrastructure

Powered by Microsoft Azure, Made2Manage Cloud delivers the rich features you need in a secure environment that is trusted by 95% of the Fortune 500. All of the information and insights you require are delivered through a complete and compelling user experience allowing you to focus on managing and growing your business.

Key Features & Benefits

- **A Trusted Platform** – Microsoft Azure features embedded security across the broadest global footprint and the largest compliance portfolio, with enterprise-grade SLAs, and industry-leading support. Aptean leverages segmentation and volume encryption to provide you with the highest degree of data security, as well as reliability and flexibility.
- **No On-Premise Equipment** – A move to the Cloud means that you can eliminate costly hardware purchases and hardware upgrades, along with the license costs for database and operating systems. You'll also avoid the high cost of in-house technical expertise to maintain that hardware.
- **Downtime Loss Avoidance** – When on-premise systems are down it's not just hardware that's not running — it's the whole company. A 99.9% uptime guarantee, plus data backups in the event of any kind of failure, ensures against potentially huge losses including wages and salaries, production downtime, reduced customer service levels, and more.
- **Never Miss An Update** – Our multi-tenant SaaS architecture ensures Made2Manage software updates and bug fixes are pushed directly to end-users, keeping everyone at your business on the latest version. When using the standard product offering, there are no additional costs associated with updates.
- **Powerful Modules Included** – Advanced Reporting and Event Management Framework (EMF) are already included in Made2Manage Cloud ERP. Since these modules are fully integrated and accessible from day 1, your business can realize even greater value, faster.
- **Grows With Your Business** – Save time and money knowing you won't have to estimate your future needs. Made2Manage ERP Cloud grows as your business does, using a scalable model to add computing power as soon as it's needed.
