

Advanced Reporting for Aptean Made2Manage ERP

Powerful & Flexible Financial and Operational Reporting

Advanced Reporting is a powerful, user-friendly solution designed to streamline financial and operational reporting, improving access to your data and visibility into your operations. Advanced Reporting for Aptean Made2Manage ERP makes it easy to create the reports and dashboards you need to make critical business decisions.

Empower Your Business

With Advanced Reporting, you can easily create financial reports based on data within Made2Manage ERP. Quickly drill down to transaction data, build reporting hierarchies and filters based on your GL structure, and generate reports for any period of time. For operational reporting, leverage Advanced Reporting's powerful data spheres to create reports based on purchasing, sales, shipments, labor, inventory transactions, and much more. Users can create graphs and dashboards, perform multi-company consolidation activities, and schedule and distribute reports with ease.

- **Real-time reporting** – Run real-time reports in a web browser on your desktop or tablet.
- **Complete visibility** – Drag-and-drop dashboards adapted to your personal preferences provide full visibility into your organization's KPIs.
- **Drill-down capability** – Easily reconcile transactions or dive into data using the built-in drill-to-source capabilities.
- **Automated reporting** – Instantly schedule, run, and publish reports in HTML, PDF, or spreadsheet formats, and distribute them on a pre-determined schedule.

Customizable dashboards provide at-a-glance visibility to key financial metrics

Report Writing Made Easy

Creating custom financial reports has never been easier, thanks to the spreadsheet-like look and feel of Advanced Reporting. Drag-and-drop reports and dashboards can be adapted to your personal preferences and provide full visibility with easy drill-down to transactions. Pre-built data spheres simplify report creation, allowing non-technical users to easily create powerful reports and analysis.

Key Features

- **Familiar report environment** – View data and create financial statements and operational reports in a familiar, Excel-like format, while avoiding the common pitfalls that spreadsheets inherently create.
- **Easy access to KPIs** – Use simple point-and-click procedures to create KPI dashboards with graphs, charts, gauges, and reports for executives. Easily group a series of reports into a single report pack to make these KPIs readily accessible.
- **Robust, customized reporting** – Set reporting hierarchies based on your GL structure and generate reports for any period of time based on actual balances, budget data, statistical data, and customer/supplier activity.
- **Multi- and cross-company functionality** – Consolidate and analyze data across multiple companies.
- **Operational spheres** – Give users access to create custom reports, trend and graph customer/supplier balances, and more by using additional data taken directly from your Made2Manage ERP database.
- **Browser access** – View and run reports, and control user distribution within the browser – all without installing an application.
- **Unlimited users** – With unlimited users, you can offer every authorized user in your organization access to the data they need.

Aptean provides very specific industries with very specific ERP, supply chain management, and compliance solutions. In today's fast-paced, highly competitive economy, organizations don't have time to waste forcing homegrown software, spreadsheets, and one-size-fits-all solutions to do things they were never designed to do. Aptean is on a mission to end those workarounds – with industry-specific solutions instead of generic software, expert support instead of making you go it alone, and a steady influx of new ideas instead of the status quo.
