

STEP UP TO SaaS

LEVERAGE THE POWER OF A CLOUD-ENABLED SOLUTION

The Step Up Program Enables You To:

- Continue utilizing your current Aptean best-in-class solution
- Migrate to the cloud to both reduce the IT burden and expand your capabilities
- Realize the immediate value of SaaS model offering

What Aptean's SaaS model offers:

Reduced Risk

Software is accessible through Aptean's secure online environment

Current Software

With easier access to software upgrades, updates, and new releases you'll always stay current

Managed Services

Aptean provides the software and installation, relieving the burden on our IT infrastructure

Long-Term Consistency

Aptean's SaaS model provides long-term defined costs, which means no more best guessing or pro-rating

Risk Management

Rest assured knowing your data is protected and you can recover quickly in an unfortunate event, like a natural disaster

Solution Extensibility

Access more areas of your Aptean solution and implement modules only as you need them

How does SaaS compare?

At Aptean, we know that all factors have time, cost and expertise implications.
We broke it down for you:

SaaS

- Low entry fee
- All Aptean and OS software is upgraded & maintained
- Managed scalability
- Backups are guaranteed
- No hardware is necessary

On-Premise

- High cost of ownership
- You manage upgrade & maintenance
- You manage backup & recovery
- You maintain hardware

Interested in learning more?

As a valued Aptean client, we encourage you to join our on-premise to SaaS conversion program. Make the switch to the cloud today.
