

## DATASHEET

# ROSS ADVANCED REPORTING

The Ross ERP Advanced Reporting tool streamlines financial reporting and gives customers a competitive edge through increased performance and visibility.

## WHAT IF YOU COULD...

- Create financial reports as easily as you create a standard spreadsheet?
- Effortlessly drill down to the GL details of the source transaction?
- Access real-time data from your Ross ERP?

More functional than a simple GL report writer, Ross Advanced Reporting is a comprehensive, yet easy-to-use reporting solution for organizations that need quick and easy access to the necessary financial data to make critical business decisions.

## WHAT IS ADVANCED REPORTING?

Advanced Reporting enables you to easily create financial reports based on financial data within Ross ERP. It allows for easy drill-down to source transaction data, building of reporting hierarchies and filters based on your GL structure, and generating reports for any period of time. Users can easily create graphs and dashboards, perform multi-company consolidation activities, and schedule and distribute reports.

## EMPOWERING COMPANIES

Ross Advanced Reporting is an industry-leading solution for enterprise report writing and drill-down analysis and provides quick access to the necessary data you need to make critical business decisions. It empowers you to better understand how your company is doing, why you are on/off track and what the best course of action is going forward. This easy-to-use software allows you to quickly create financial reports with an Excel-like look and feel that you are familiar with.

Through the following key features, Ross Advanced Reporting will improve your company's long-term performance by giving you the ability to find answers to vital business questions:

### Pre-integration

Ross Advanced Reporting comes with real-time integration to your Ross ERP database, so you can immediately begin creating reports without requiring a detailed knowledge of your underlying database layout.

### Drill-down capability

Ross Advanced Reporting allows you to access information with just a click of your mouse; no special programming required. Imagine the power of being able to analyze any number you see on a report just by clicking on it and see details regarding its source.

### Familiar report environment

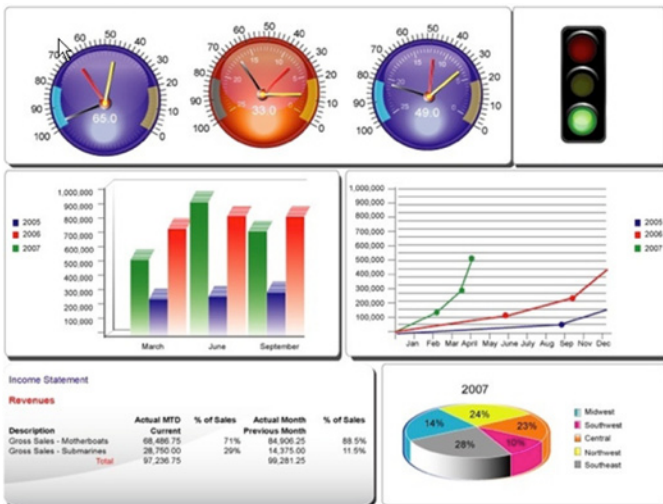

With Excel-like templates, Ross Advanced Reporting has the look and feel of a standard spreadsheet, but completely eliminates the common pitfalls that spreadsheets inherently create with its direct connection to your database.

### View KPIs

Create dashboards with graphs, charts, gauges, and reports using simple point-and-click procedures. Also, group a series of reports in a single report packet that makes critical performance indicators accessible.

### Schedule reports to run and be distributed automatically

With Ross Advanced Reporting's scheduling server, reports will be automatically produced on pre-determined schedules, published in HTML, PDF, or spreadsheet formats, and distributed to team members.

## REPORT WRITING MADE EASY

Creating custom financial reports has never been easier, thanks to the spreadsheet look and feel of the Ross Advanced Reporting solution. Drag and drop dashboards that can be adapted to your personal preferences provide full visibility and ease of use, enabling you to drill down to GL transactions. Customizable filter trees let you slice and dice financial data, and the real-time connection to your database ensures accuracy of the requested data.

Ross Advanced Reporting allows for the import of existing spreadsheets, facilitating an extensive data analysis and making your consolidation process more comprehensive and more efficient. Beyond that, the Advanced Reporting Scheduler adds convenience by automatically running and electronically distributing reports on pre-determined schedules.

## WITH ROSS ADVANCED REPORTING, YOU CAN...

- Create reports quickly
- Report on real-time data
- Provide end users with drill-down enabled reports
- Create dashboards to monitor the performance of the company
- Highlight variances and enable users to get quick answers to their questions and make smarter decisions
- Consolidate and analyze data between multiple companies
- Improve Period End close process
- Eliminate manual update of Excel spreadsheets
- Improve business efficiencies and visibility to financial data
