

# Paragon Routing and Scheduling from Aptean

## Single Depot

Paragon Routing and Scheduling from Aptean is an advanced route optimization software solution that can reduce planning time and decrease transportation costs. Single Depot is designed specifically for the unique needs of single depot operations.

## Plan Your Transportation More Efficiently

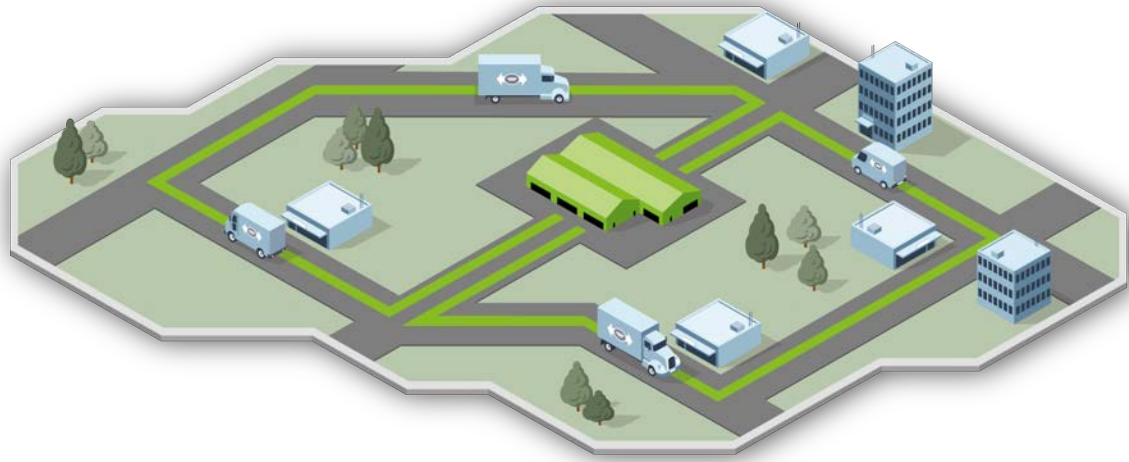

- **Save Time** – Planned call data is used to determine the most efficient routes in minutes, saving hours of planning time and freeing up transport planners to do more strategic tasks
- **Cut Costs** – Cut transport costs by up to 30% and improve operational efficiency with better routes and more accurate arrival times, in addition to keeping vehicle mileage to a minimum
- **Incorporate Specific Data** – Operational details such as delivery quantities, customer addresses, time windows, vehicle fleet sizes and driver shifts can be taken into account when calculating routes
- **Leverage Powerful Business Intelligence** – Create custom performance reports to reflect specific KPIs, and then share in multiple formats

## Streamline Operations and Communication

- **Model Alternate Scenarios** – Once you have completed your transportation plan for the day, you can then carry out what-if modeling based on actual historical data from your transportation operation
- **Keep Business Functions Aligned** – Routing and scheduling details can be sent directly to the warehouse for picking and vehicle loading, ensuring all your functional areas remain aligned
- **Integrate with Applications** – Our solutions are designed for fast, easy integration with applications like sales order processing and warehouse management systems, further streamlining internal processes

## Benefits

- Build accurate, achievable route plans
- Increase driver productivity
- Cut mileage and emissions
- Reduce delivery lead times
- Decrease overtime and spot-hire costs
- Reduce planning time (from hours to a few minutes)
- Offer customers later order cut-off times
- Utilize for both operational and strategic planning

*Paragon Routing and Scheduling Single Depot from Aptean was specifically created to address the challenges faced by single depot operations. If your business grows, upgrading to Multi Depot or Integrated Fleet can be done easily – without impacting your transportation operation.*

## Ensuring a Successful Implementation

Our proven approach to implementation ensures the quick and efficient installation of your system, so users can start to see the benefits as soon as possible.
