

Aptean TabWare Mobile for Oil & Gas

Anywhere, Anytime Access to your EAM in the Field

TabWare Mobile provides oil and gas field operators or personnel with a solution that can operate in and out of range of cell, WiFi, or other networks. Deployed as a native mobile application, TabWare Mobile delivers a robust, yet easy to use, experience across a variety of mobile devices. It enables your team to have real-time access to EAM (enterprise asset management) data as well as perform work while in the field or on operating sites regardless of whether they are on- or off-line. TabWare Mobile gives maintenance technicians the ability to download work assignments, review necessary execution information, and comprehensively report on the completion of their tasks, while being led through an intuitive step-by-step workflow within the application. With TabWare Mobile, your oil and gas operation will benefit from a safer work environment, increased regulatory compliance, labor savings, and access to data for valuable and actionable insights into operational improvements – all leading to increased revenue and profitability. Just a few of the many features of TabWare Mobile include:

Completion Wizard – Streamline work processes with an intuitive and configurable guided workflow that enables users to efficiently perform work activities while out in the field.

Link Image – Take a picture using your mobile device and upload it to a specific work order to give additional context and clarity on the asset.

My Work List – Ready access to work assignments and work detail to support the work process and ensure complete visibility into maintenance progress.

Work Order – Create new, update, or complete work order action items and statuses from a mobile device to improve data accuracy with point-of-execution data capturing capabilities.

Extend Access to Field and Operating Sites

With the production technologies available today, oil and gas operators are able to get to reserves in more remote places than ever before. And while network connectivity is increasingly ubiquitous, there are many areas which have either intermittent or no coverage in which to operate. With TabWare Mobile, field operators can access their EAM system at any place and time. As production expectations accelerate and regulatory requirements increase, TabWare Mobile ensures that operational assets run effectively and efficiently in order to maximize economic opportunity.

Benefits of TabWare Mobile

Anywhere, Anytime Access

View and execute work whether on- or off-line to ensure you can work better and faster, extending EAM access to field and operating sites.

Efficient Work Execution

Easy-to-use functionality that was designed to work the way you do, resulting in increased wrench-time and reduced non-productive time.

Point-of-Execution Data Capture

Instantly track/report completed work. View a work list, capture notes/meter readings, or create new work orders directly.

Data Synchronization

Access your EAM data on-the-go from your mobile device and auto upload data to your backend EAM system.

Paperless Environment

Eliminate the need for paper work orders with the ability to view, open, and close out work orders through a mobile device.

Improved User Experience

Tailor the experience for end users by leveraging TabWare's extensive configurability for queries, screens, text, messages, and workflows.

For more information on Aptean TabWare's Mobile solution, email us at info@aptean.com.

Aptean provides very specific industries with very specific ERP, supply chain management, and customer experience solutions. In today's fast-paced, highly competitive economy, organizations don't have time to waste forcing homegrown software, spreadsheets, and one-size-fits-all solutions to do things they were never designed to do. Aptean is on a mission to end those workarounds – with industry-specific solutions instead of generic software, expert support instead of making you go it alone, and a steady influx of new ideas instead of the status quo.
