

Aptean TradeBeam

Global Trade Management Solution

Aptean TradeBeam is a global trade management (GTM) software-as-a-service (SaaS) solution that helps companies engaged in international trade streamline their operations, enhance supply chain visibility, and efficiently manage compliance with ever-changing global regulations. TradeBeam delivers streamlined support for restricted party screening, export license determination, duty rate retrieval, classification, and more.

Intelligent Global Trade Support

As a business engaged in global trade, you need to ensure compliance with a vast range of regulations – a process that can be time-consuming and complex. TradeBeam streamlines the difficult tasks associated with global trade compliance while preventing costly errors and oversights – so you can get back to running your business.

With TradeBeam, you can:

- **Accelerate the Screening Process** – TradeBeam provides intensive, automated screening for restricted and denied parties, restricted end-users, embargoes, and more, helping you stay compliant without slowing down your operations.
- **Easily Manage Export Licenses** – TradeBeam centralizes and tracks your export licenses and reviews your shipments for license requirements, helping you stay in sync with export regulations.
- **Access the Latest Global Trade Data** – TradeBeam's Global Trade Content service gives your enterprise access to accurate, up-to-date global trade content for more than 200 countries, putting a world of global trade information right at your fingertips.

Benefits

- Improve export compliance and reduce risk of violations
- Accelerate screening processes and reduce labor costs
- Streamline financial trade
- Improve recordkeeping

Key Features

- **Classification & Global Parts Catalog** – TradeBeam’s Global Parts Catalog supports Harmonized System (HS), Harmonized Tariff Schedule (HTS), and Export Control Number (ECN) classifications, and contains data on Other Governmental Agency (OGA) requirements, trade agreements, and more.
- **License Determination & Management** – TradeBeam reviews your export shipments for license requirements or exceptions, performs embargo and anti-boycott screening, and helps you track and manage export licenses, alerting you to approaching expiration or exhaustion.
- **Automated Restricted Party Screening** – TradeBeam automatically screens parties involved in export transactions against numerous restricted and denied parties lists – alerting you to potential matches before any business transactions occur.
- **End-User Screening** – Perform thorough end-use and end-user screening during the order process to determine if a party’s profile permits shipment.
- **Integrated Reporting & Audit Trail** – Easily create reports and automatically track changes to products, parties, shipments, and more. All export documents, processes, and partner communications are archived in an integrated audit trail, so you’ll always be prepared for an audit.

Additional Offerings

- **Restricted Party Screening (Plug-In Solution)** – Designed to integrate with your existing corporate software, TradeBeam’s plug-in Restricted Party Screening solution efficiently checks the parties you are doing business with against an extensive number of restricted party lists.
- **Global Trade Content Service** – Get access to accurate, complete, up-to-date global trade content so you can make informed financial and compliance decisions. The service offers coverage of over 200 countries and a vast range of content options, including preferential duty rates, classification data, compliance requirements, and more.

Aptean provides very specific industries with very specific ERP, supply chain management, and customer experience solutions. In today’s fast-paced, highly competitive economy, organizations don’t have time to waste forcing homegrown software, spreadsheets, and one-size-fits-all solutions to do things they were never designed to do. Aptean is on a mission to end those workarounds – with industry-specific solutions instead of generic software, expert support instead of making you go it alone, and a steady influx of new ideas instead of the status quo.
